New! eHealth Plans Available through The Alumni Insurance Program.

USI knows the importance of quality health coverage at an affordable price. That's why we've partnered with eHealth, a leading online source of health insurance for individuals, families, small businesses and seniors. eHealth allows alumni to compare insurance plans and prices from over 180 insurance companies nationwide through The Alumni Insurance Program (The AIP). This new partnership with eHealth puts the top health insurance plans at the fingertips of your alumni in minutes.

Why Shop with eHealth?

Free Quotes: At eHealth you can get a free health insurance quote without providing your phone number or email address. eHealth's licensed insurance agents are available online through chat, or over the phone, to answer your health insurance questions. No unsolicited phone calls or annoying emails just to get a quote. When you're ready to enroll, they're there to help.

Best Available Price for Each Plan:

When you shop at eHealth, you will get the same price for each plan that you would get if you bought the plan directly from the insurance company, or through the government marketplace in most states. Prices are regulated by law, and eHealth can even help you apply for available subsidies in most states. eHealth is paid by insurance companies to distribute their plans, assist with enrollment, and provide post-enrollment support.

Outstanding Service: eHealth has an A+ Rating from the Better Business Bureau and their licensed agents consistently earn net-promoter scores (a measure of customer loyalty) of 80 or better. Best of all, when you apply for health insurance coverage with eHealth, eHealth is responsible for making sure your application is submitted to the insurer accurately and on time. eHealth provides 24/7 customer support if customers have issues with their applications or claims.

Great Selection: eHealth has the largest selection of health insurance plans online. That includes:

- **Major Medical Health Plans:** Find many of the **Affordable Care Act (AKA Obamacare plans)** you'll find on government exchanges at eHealth, as well **major medical plans** you won't find on any government sites. *Starting prices average \$300 per month*
- **12 and 6-month Short-Term Coverage:** eHealth also has a massive selection of 12-month and 6-month short-term plans available online. These plans cover less than major medical plans, but are generally less expensive. *Starting prices average \$75 per month*
- **Affordable Guaranteed Issue Coverage:** eHealth has a large selection of Medical Insurance Packages that provide coverage for medical events like hospitalization and office visits, often with no deductible and no medical underwriting. These plans cover less than major medical plans, but are generally less expensive. *Starting prices average \$90 per month*
- **Small Group Health Insurance:** If you're a small business owner with at least one full-time employee (who is not your spouse), eHealth can help you compare and enroll in health insurance plans for your small business. *Starting prices average \$250 per month for employers who pay 50% of monthly premiums.*

Prices shown are national averages based on eHealth data. Actual prices available depend on state, age, and other individual circumstances. Short-Term Coverage and Medical Insurance Packages do not provide the minimum essential benefits of the ACA, are not eligible for subsidies, and do not protect you from any state tax penalty for not maintaining health insurance.
